

Class Diagram Description

This document describes a simple class diagram for an Airline Booking System.

1. User Class

- Attributes: userId, name, email, password
- Methods: login(), register(), updateProfile()

2. Flight Class

- Attributes: flightId, departure, destination, date, time, capacity
- Methods: checkAvailability(), updateSchedule()

3. Booking Class

- Attributes: bookingId, userId, flightId, seatNumber, status
- Methods: createBooking(), cancelBooking(), confirmBooking()

4. Payment Class

- Attributes: paymentId, amount, method, status
- Methods: processPayment(), refund()

Relationships:

- A User can have multiple Bookings.
- A Booking is associated with one Flight.
- A Booking may require a Payment.
